## PROFESSIONAL SUMMARY

Software Engineer with 4+ years of professional experience specializing in PHP, Laravel, PIM systems, REST APIs, e-commerce integrations, and backend automation. Hands-on experience developing and customizing UnoPim, building third-party commerce connectors, API/webhook integrations, cloud storage solutions, and workflow automation using n8n and Zapier. Also experienced with Node.js, JavaScript/TypeScript, Docker, AWS, Elasticsearch, MySQL, PostgreSQL, and MongoDB.

## TECHNICAL SKILLS

- **Languages:** PHP, JavaScript, TypeScript, Python, SQL
- **Frameworks & Runtime:** Laravel, Node.js, Vue.js, Django
- **PIM & E-commerce:** UnoPim, Akeneo, Bagisto, WooCommerce, WPML, CS-Cart, Shopware, Odoo, BigCommerce, Icecat
- **Backend & Integration:** REST APIs, Webhooks, API Integration, Queue Processing, Event-Driven Architecture, Authentication, Background Jobs, MVC, OOP, SDLC
- **Cloud & DevOps:** AWS, AWS S3, AWS EC2, Azure Storage, Cloudflare R2, Docker, Linux, VPS Deployment, cPanel
- **Databases & Search:** MySQL, PostgreSQL, MongoDB, Elasticsearch
- **Automation:** n8n, Zapier Platform, Workflow Automation
- **Tools:** Git, GitHub, Bitbucket, Postman, Composer, npm, PHPUnit
- **Payments & Commerce APIs:** PayU, Razorpay, Shiprocket
- **AI:** OpenAI API, Gemini API, Claude API, RAG, Prompt Engineering, GitHub Copilot, Cursor AI, ChatGPT

## PROFESSIONAL EXPERIENCE

### SOFTWARE ENGINEER

*Webkul | Jan 2025 - Present | Noida, UP*

- Develop and customize UnoPim (a Laravel-based PIM platform) to support advanced product/catalog workflows, tier pricing, product history, preview/recovery workflows, and multichannel product-data synchronization.
- Customized and extended open-source PIM/e-commerce platforms and integrations, including UnoPim and Bagisto.
- Developed third-party connectors and API integrations bridging UnoPim with major commerce platforms, including WooCommerce (with WPML), Bagisto, CS-Cart, Shopware, Odoo, BigCommerce, Icecat, and XML-based integrations.
- Implemented object-storage integrations using AWS S3, Azure Storage, and Cloudflare R2, supporting scalable asset and catalog data workflows (DAM / Digital Asset Management).
- Developed the UnoPim Zapier integration, including the Node.js-based Zapier Platform App and Laravel/PHP extension, implementing API authentication, webhook communication, product actions, event triggers, and queue-based processing.
- Developed the n8n-nodes-unopim community node for UnoPim, enabling PIM catalog automation through REST APIs, CRUD operations, webhook-based triggers, filtering, pagination, and queue-based event delivery.
- Integrated PayU and optimized background processing, Elasticsearch, and robust backend architectures.

**SOFTWARE ENGINEER***Alobha Technologies Pvt. Ltd | Jun 2024 - Dec 2024 | Noida, UP*

- Developed "Styliv", a scalable multi-vendor E-commerce platform, integrating Razorpay for secure transactions and Shiprocket for automated order fulfillment.
- Designed and implemented a comprehensive SaaS-based Human Resource Management System (HRMS) to automate payroll and manage multi-level leave approvals.
- Deployed and maintained applications on cloud/VPS environments (AWS, DigitalOcean).
- Implemented unit testing (PHPUnit) and integration testing for core features.

**SOFTWARE ENGINEER***NDMEAA (A.A.P.S Ecommerce World Pvt Ltd) | Nov 2023 - May 2024 | Lucknow, UP*

- Engineered the backend development of "Googly11", a fantasy cricket app using PHP Laravel.
- Integrated RapidAPI for real-time live match scores, player statistics, and team performance tracking.
- Developed scalable APIs to support team creation and live contests.

**SOFTWARE ENGINEER***Locgfx | Sep 2022 - Nov 2023 | New Delhi*

- Developed REST APIs and comprehensive admin dashboards with multi-login support for SaaS communication tools like "Kidseau".
- Collaborated on "Ataraxis", a Tele-health SaaS platform, implementing video calling and appointment booking systems.
- Delivered digital solutions for the "SeedTree" project management module.
- Debugged and resolved critical backend issues to optimize database queries and system stability.

**SELECTED PROJECTS**

- **UnoPim n8n Community Node:** Connects UnoPim catalog operations and events with n8n workflows utilizing Node.js, TypeScript/JavaScript, REST APIs, and Webhooks.
- **UnoPim Zapier Integration:** Built both the Node.js Zapier Platform App and the Laravel/PHP extension utilizing REST APIs, Webhooks, and Queues.
- **UnoPim Docker / Deployment Work:** Authored Docker deployment strategies and configuration docs utilizing AWS, Linux, Laravel, PHP, Redis, MySQL, and Elasticsearch.
- **Bagisto REST API / UnoPim Integration:** Core contribution and REST API development for bridging Bagisto with UnoPim.
- **Symmetry (Personal Project):** Developed a computer-vision application to detect lines of symmetry in images using Python and OpenCV.
